

# RAKESH S

Developer – PL/SQL developer - Capgemini

**Address** Bengaluru, KA, 560054

**Phone** +919663222425

**E-mail** siddurakesh5@outlook.com

## Senior Analyst – PL/SQL Developer

Capgemini, Bangalore, Karnataka

December 2022 – Present

Experienced PL/SQL Developer | Python automation | Oracle & Cloud Application Professional

### Core Responsibilities and Contributions

- **Advanced Database Development:** Engineered and refined intricate PL/SQL database components, including procedures, triggers, and packages, to support transformative projects for clients in the public sector and manufacturing industries, such as ArcelorMittal.
- **Data Workflow Optimization:** Delivered robust database solutions for Order-to-Cash (OTC) and Lead-to-Order workflows across European geographies, ensuring seamless operations for critical business processes.
- **Salesforce CRM Integration:** Designed tailored PL/SQL-based integrations for Salesforce CRM implementation in a major Norwegian manufacturing firm, enabling streamlined data synchronization.
- **Business Process Automation:** Introduced automated workflows using PL/SQL to reduce manual dependencies, improving accuracy and efficiency in critical operations.
- **ERP Modernization Projects:** Played a key role in migrating legacy Oracle database systems to SAP S/4 HANA during ERP upgrades, ensuring smooth transitions with no data loss.
- **Cross-Functional Collaboration:** Worked closely with business teams, architects, and stakeholders to gather requirements, design solutions, and deliver impactful results aligned with business goals.

### Key Achievements

- Successfully contributed to a \$50M annual revenue through timely delivery of high-quality solutions and new project wins.
-

- Spearheaded the optimization of database query performance, leading to a measurable reduction in system response times.
- Provided critical support for integrating cloud and on-premises databases, driving scalability for clients' operations.

With a deep understanding of database development, scripting, and integration, I excel at delivering tailored solutions that enhance performance, streamline operations, and drive business growth. My proficiency in both on-premise and cloud environments positions me as a valuable resource for modern, scalable IT solutions.

---

## Work History

---

2022-12 – Current

### Key Responsibilities and Achievements

- Database Development & Solution Design:
  - Designed and optimized complex PL/SQL procedures, triggers, functions, and packages to support large-scale transformation projects across the public sector and manufacturing verticals in Europe, including projects with ArcelorMittal.
  - Provided database solutions for Order-to-Cash (OTC) and Lead-to-Order processes, ensuring seamless integration and efficient data workflows for clients in Spain and South Central Europe.
  - Conducted detailed requirements analysis and developed customized PL/SQL-based solutions for Salesforce CRM integration for a major manufacturing company in Norway.
- Process Automation & Optimization:
  - Streamlined business processes by implementing PL/SQL-based automation for critical operations, enhancing efficiency and reducing manual effort.
  - Migrated and optimized Oracle database systems during ERP 6.0 to SAP S/4 HANA (SD-OTC) transformation projects, ensuring data integrity and minimal downtime.
